Cyber Essentials & Cyber Essentials Plus

Cyber Essentials & Cyber Essentials Plus

We have a team of subject matter experts that can work with your business to ensure its readiness for certification, and we are also registered with IASME to certify your business to both Cyber Essentials and Cyber Essentials Plus.

Achieving these standards will help protect your organisation from cyberattacks, provide confidence to your customers and help you win business from organisations that require Cyber Essentials or Cyber Essentials Plus certification to work with them.

Our Approach

Evalian will support you through the entire process, providing you with a qualified security consultant and a project coordinator to help ensure the required work and certification process is completed on time.

Why Evalian?

We have a team of genuine Cyber Essentials experts, including security consultants and penetration testers, to support you through to certification. We have used our significant experience to develop a streamlined process, designed specifically to take the pain and heavy lifting away from you.

Cyber Essentials

Cyber Essentials is a government backed certification that protects your organisation from the most common cyberattacks. There are five basic controls to enforce:

- Use a firewall to secure your Internet connection
- Choose the most secure settings for devices & software
- Control who has access to your data & services
- Protect yourself from viruses & other malware
- Keep your devices & software up to date

To become Cyber Essentials certified you must demsonstrate to an assessor how you comply with the control areas listed above. We can help you ensure that you meet required standard, assess your compliance and issue your Cyber Essentials certificate upon passing.

Cyber Essentials Plus

To achieve Cyber Essentials Plus you must first certify to Cyber Essentials, as covered above, and then undergo a technical assessment to ensure your controls are effective against real world threats. These assessments include:

- Internal vulnerability scan
- External vulnerability scan
- User Access Controls test
- Web browser check
- Email blocker check

We can help you prepare your controls for testing, carry out the technical assessment and issue your Cyber Essentials Plus certificate upon passing.

Cyber Essentials & Cyber Essentials Plus

If your organisation is ready for certification, then we can proceed to the assessment stage straight away.

Please refer to options 'a' or 'b' in the table.

If you need some support with identifying gaps in your readiness and the associated remediation, we will work with you to ensure you are fully prepared for first time certification.

Please refer to options 'c' and 'd' in the table.

FAQs

What is the process?

Once we have a signed SoW in place, we will issue a scoping questionnaire and certification question set for completion. Once these have been completed, we will agree dates for reviews and assessments.

How long does it take?

We aim to have all Cyber Essentials certifications completed within five business days of receiving the completed questionnaire, and Cyber Essentials Plus within eight days.

How long does the certification last?

Both standards expire 12 months after certification.

Can I just get Cyber Essentials Plus?

To achieve CE Plus, you need to have been certified to Cyber Essentials within the previous three months.

What will we receive upon passing?

You will receive a report to show what was tested, your certificate, the CE logo for use on your website / marketing collateral, and your company will be placed on the NCSC's register of certified companies.
